

QA Testing case.

We love to challenge our candidates, so we kindly ask that you complete the bellow assignment as part of your application for the QA Engineer position. The completed assignment is due by {4 day assignment}.

#0 Please access the following sample application - <http://computer-database.herokuapp.com/computers>

#1 Create a series of manual test cases that cover the CRUD operation plus the edge cases. Make sure you give detailed instructions for each test case (pre conditions, steps, expected results). You can use any format you want.

#2 Write scripts that would automate the manual test cases that you see fit to be included in a regression test set. Please use any of below programming languages:

Javascript (preferred)

Java (preferred)

Python

Ruby

Please avoid frameworks that only record test cases.

#3 When the assessment is completed, please push the file containing the manual test cases and the automation project to GitHub and provide us a link to the repository.

Should you have any further questions, please do not hesitate to contact us.
